LNPATS ERP — User Manual

Liberia National Police Academy & Training School · Enterprise Resource Planning System

Edition: October 2026 · Page 1: Summary & Essentials

Summary

The LNPATS ERP is one secure web system for the whole Academy: personnel and HR, leave, training, finance, procurement, inventory and logistics, ICT helpdesk, registry, documents and daily command reporting. Every action is recorded in the audit log, and each person only sees the screens their role allows. Approvals always move stage by stage — nobody can approve their own request or skip a stage.

Most important things to know

1. Sign in with your official email and password, or Continue with Google. Never share your password; sign out on shared computers.

2. Roles control access. New accounts start as Officer. Only the System Administrator gives extra roles in Users & Roles.

3. Check the Notification Center daily — approvals waiting for you, returned items and overdue reports appear there.

4. Daily reports are due on weekdays. Overdue alerts run from 3 pm to 6 pm Liberia time.

5. Stock changes only through Receipts, Issues and Reconciliations. Balances update automatically; nobody edits quantities by hand.

6. All records are audited and cannot be secretly changed. Personnel files are private to HR.

Key approval chains

Process	Approval order
Academy leave	Section Head → Asst. Commissioner → Deputy Commissioner → Commandant → HR
HR leave	Supervisor → HR
Procurement	Department Head → Procurement → Finance → Commandant (+ Chief of ICT for ICT items)
Expenses	Finance; over $10,000 also needs the Commandant
Command supplies	Five command stages → stock reserved → Logistics issues → requester signs pickup
Graduation	DC Academy / Commandant approve → certificate issued automatically

Who does what

System Administrator	Users, roles, organization, audit
HR Administrator	Personnel files, accounts, promotions, leave processing
Commandant	Final approvals, command oversight
Finance / Procurement	Budgets, expenses, purchasing, vendors
Storekeeper / Logistics	Stock, receipts, issues, assets, vehicles
ICT staff	Helpdesk tickets and equipment
Registry Officer	Incoming and outgoing correspondence
All officers	Leave, supplies, daily reports, ICT tickets

Help: report problems through the ICT Helpdesk. The full step-by-step guide for each module follows from page 2.

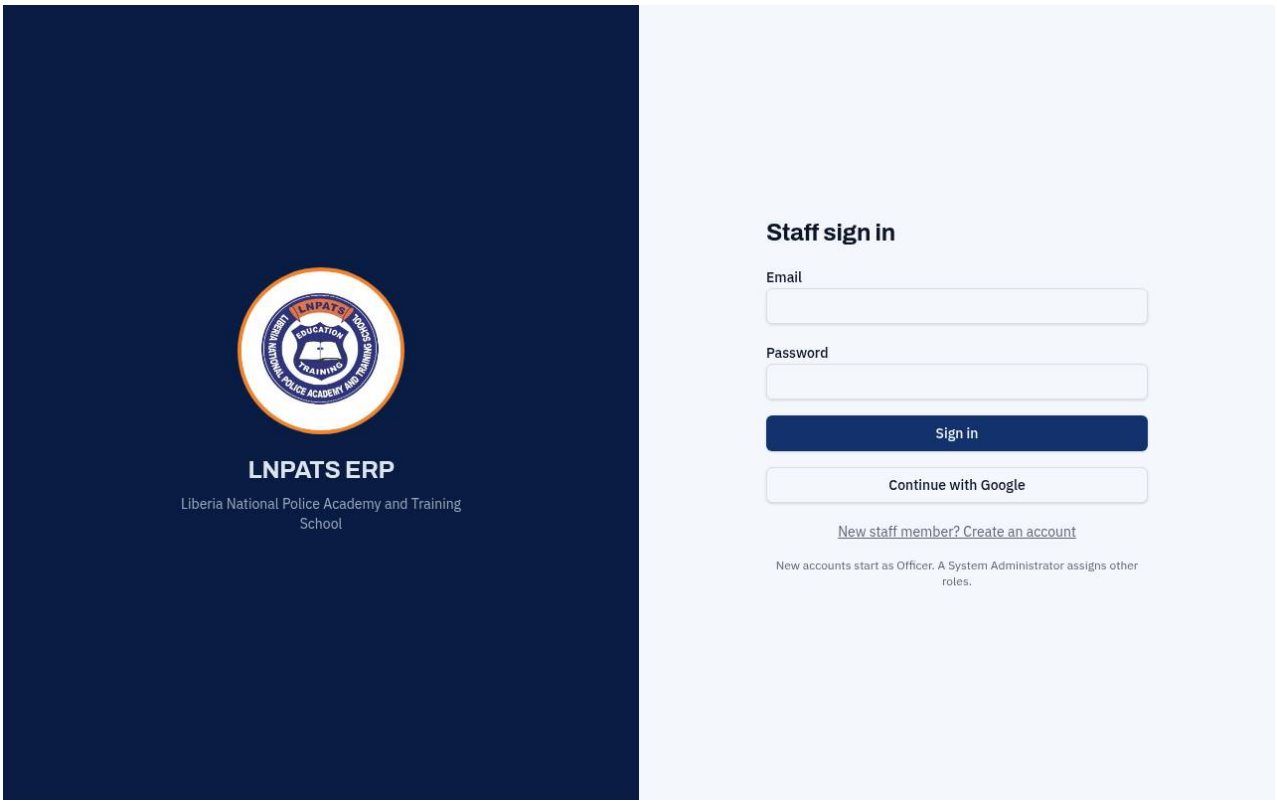

Contents

1. Getting started & signing in — Everyone
2. Dashboard & navigation — Everyone
3. Organization structure — System Administrator
4. Officers registry — HR, Administrators
5. Leave management — All officers; approvers by stage
6. Human Resources — HR Officer, HR Administrator, Commandant
7. Training (Academy) — DC Academy, Section Heads, Commandant
8. Finance management — Finance Administrator, Department Heads, Commandant, Auditor
9. Procurement — Procurement Officer/Admin, Finance, Commandant, Storekeeper
10. Inventory & warehouses — Storekeeper, Logistics
11. Receipts, issues & stock movements — Storekeeper
12. Supply & equipment requests — All officers; approvers
13. Suppliers, assets & vehicle bookings — Logistics, System Administrator
14. ICT Helpdesk — All officers; ICT staff
15. Command chain reports & supplies — All officers; supervisors, section heads, Commandant
16. Notification Center — Everyone
17. Registry (correspondence) — Registry Officer, Commandant
18. Documents — All staff; approvers
19. Global search — Everyone
20. Audit log — System Administrator, Auditor
21. Users & roles — System Administrator

1. Getting started & signing in

Who uses it: Everyone

Open the LNPATS ERP in your web browser and sign in with your official email and password, or with Google.

Steps

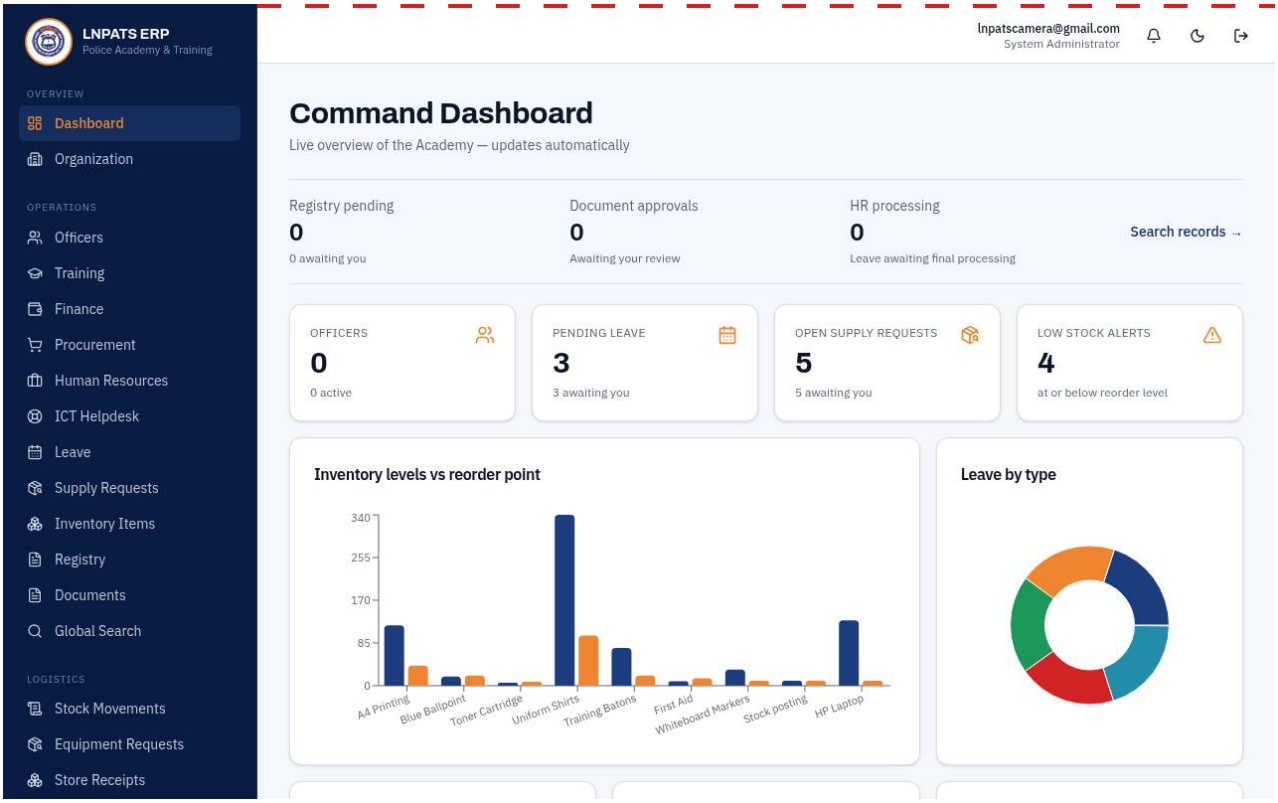

1. Go to the LNPATS ERP web address.
2. Enter your email and password and press Sign in, or choose Continue with Google.
3. New accounts start as Officer. The System Administrator assigns extra roles in Users & Roles.
4. Use the moon icon at the top right to switch between light and dark display, and the arrow icon to sign out.

Tip: Never share your password. Sign out when using a shared computer.

2. Dashboard & navigation

Who uses it: Everyone

The Dashboard summarises personnel, pending approvals, stock alerts and recent activity. The left menu lists every module you have access to.

Steps

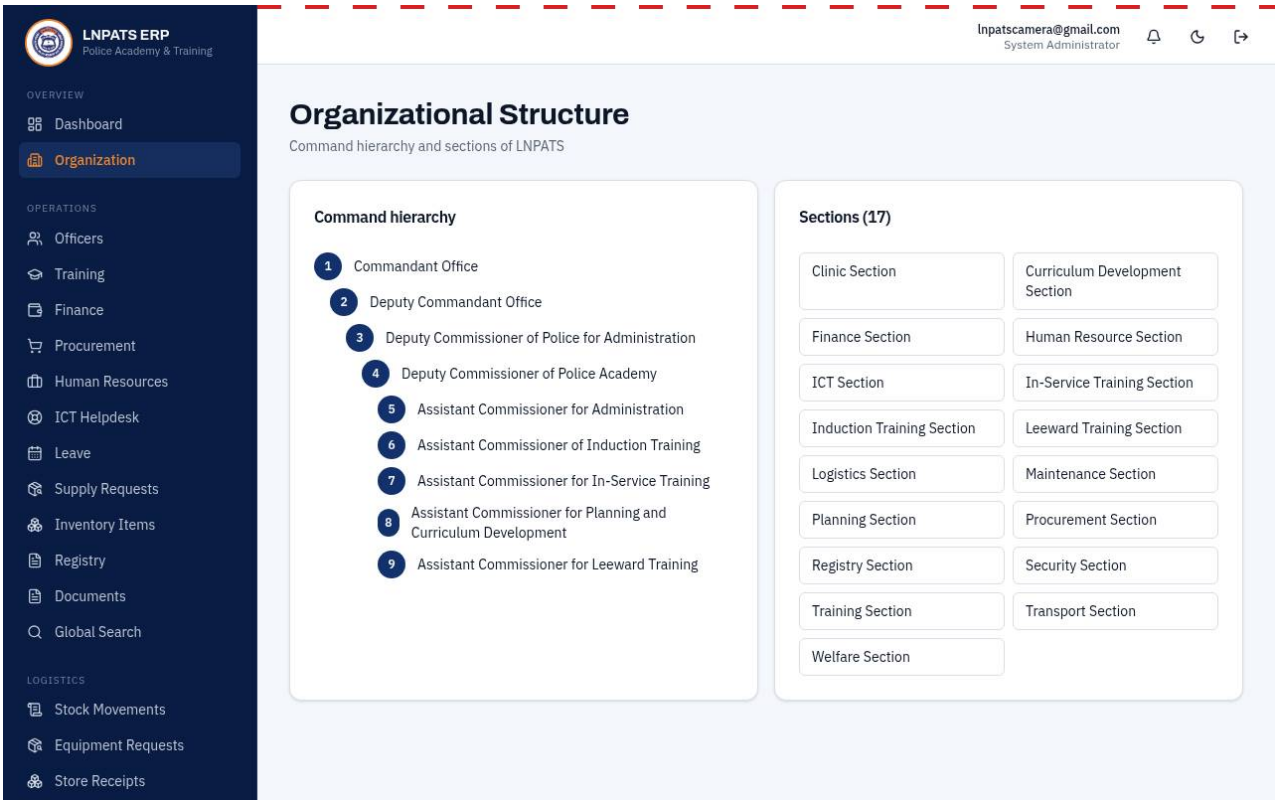

1. Use the left menu to open any module (Overview, Operations, Logistics, Administration).
2. Click the bell icon to see notifications about requests waiting for you.
3. On a phone or small screen, open the menu with the button at the top left.

Tip: Menu items you are not authorised to use show an access notice instead of data.

3. Organization structure

Who uses it: System Administrator

Lists LNPATS offices and their sections, used throughout HR, Finance, Leave and Procurement.

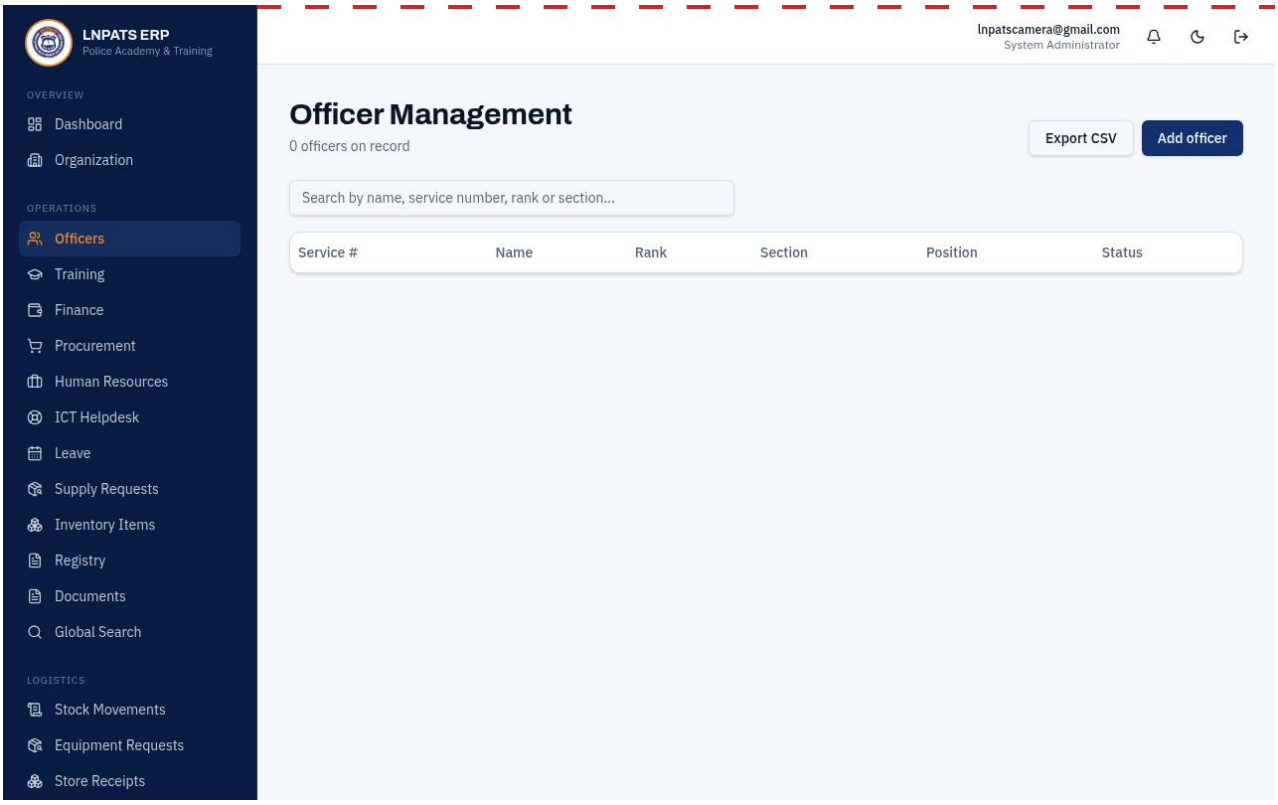

Steps

1. Open Organization from the menu.
2. Review offices and the sections under each.
3. Administrators can add or rename sections.

4. Officers registry

Who uses it: HR, Administrators

The master list of officers with service numbers, rank, section and ID card details.

Steps

1. Open Officers and search by name, number or rank.
2. Press New officer to register a person and fill in the form.
3. Click an officer to open the profile, upload documents and print the ID card.

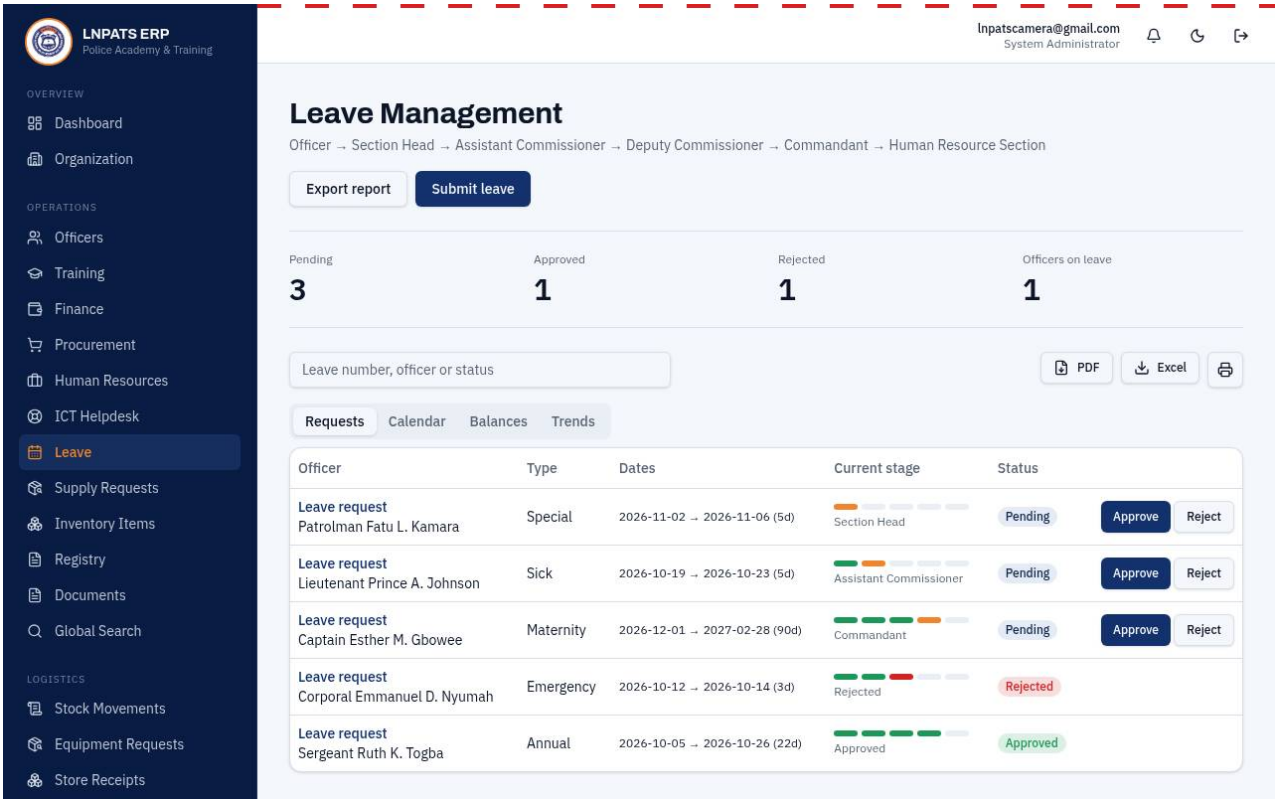

Tip: Service numbers and employee numbers are permanent and cannot be changed.

Tip: Ranks follow the official order: DIGP, Comm., DCP, ACP, CSP, SUPT., CIP, Insp., SGT., Cpl.

5. Leave management

Who uses it: All officers; approvers by stage

Apply for leave and track it through the Academy approval chain: Section Head → Assistant Commissioner → Deputy Commissioner → Commandant → HR processing.

Steps

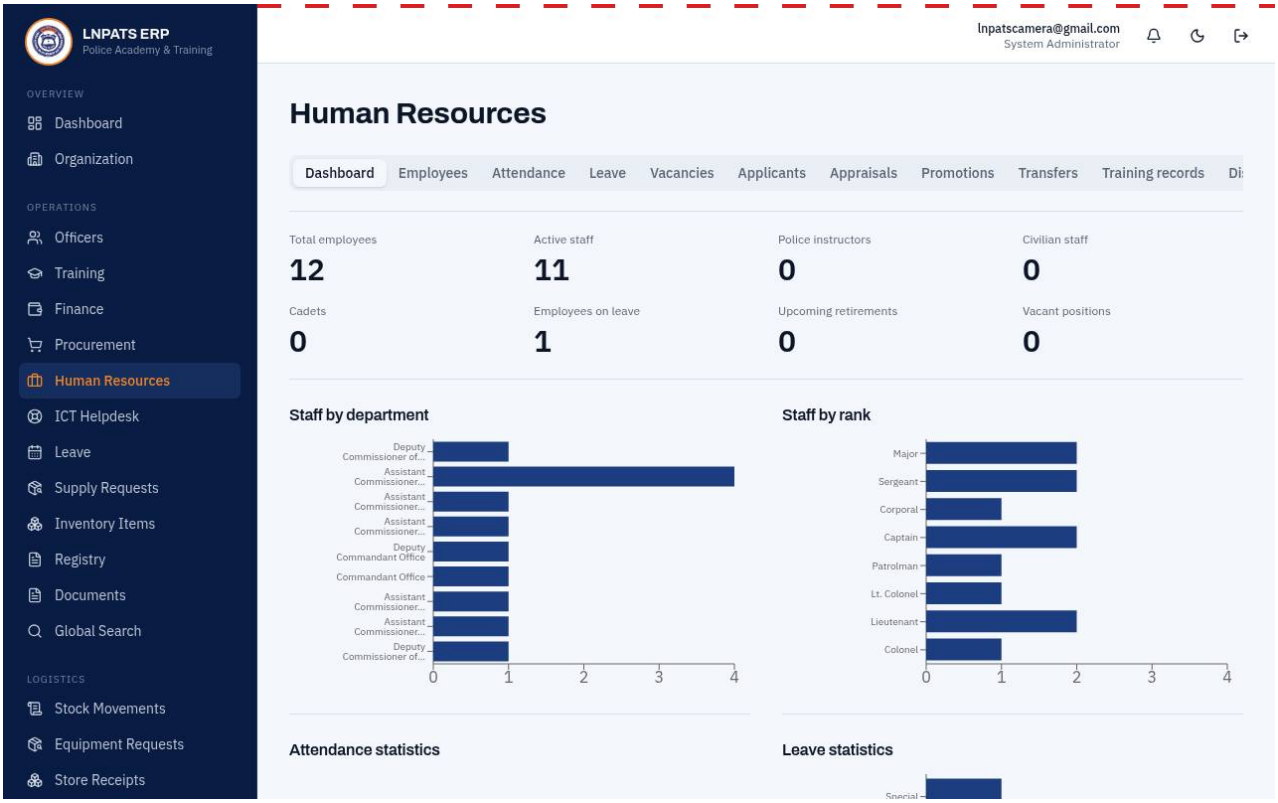

1. Open Leave and press New request.
2. Choose the leave type, dates and reason; attach supporting files if needed.
3. Submit. The request moves stage by stage; each approver sees it in their queue.
4. When fully approved, download the approval letter from the request.

Tip: Your remaining annual balance is shown before you submit.

6. Human Resources

Who uses it: HR Officer, HR Administrator, Commandant

Employee records, attendance, HR leave, recruitment, appraisals, promotions, transfers, discipline, training records, payroll summaries and reports.

Steps

1. Open Human Resources and choose a tab (Employees, Attendance, Leave, Recruitment, etc.).
2. Register employees and upload private personnel documents.
3. Record attendance manually or scan an officer's QR code with the camera.
4. Create promotions, transfers or disciplinary cases; approvers act with Approve / Reject.
5. Use Reports to download PDF or Excel summaries.

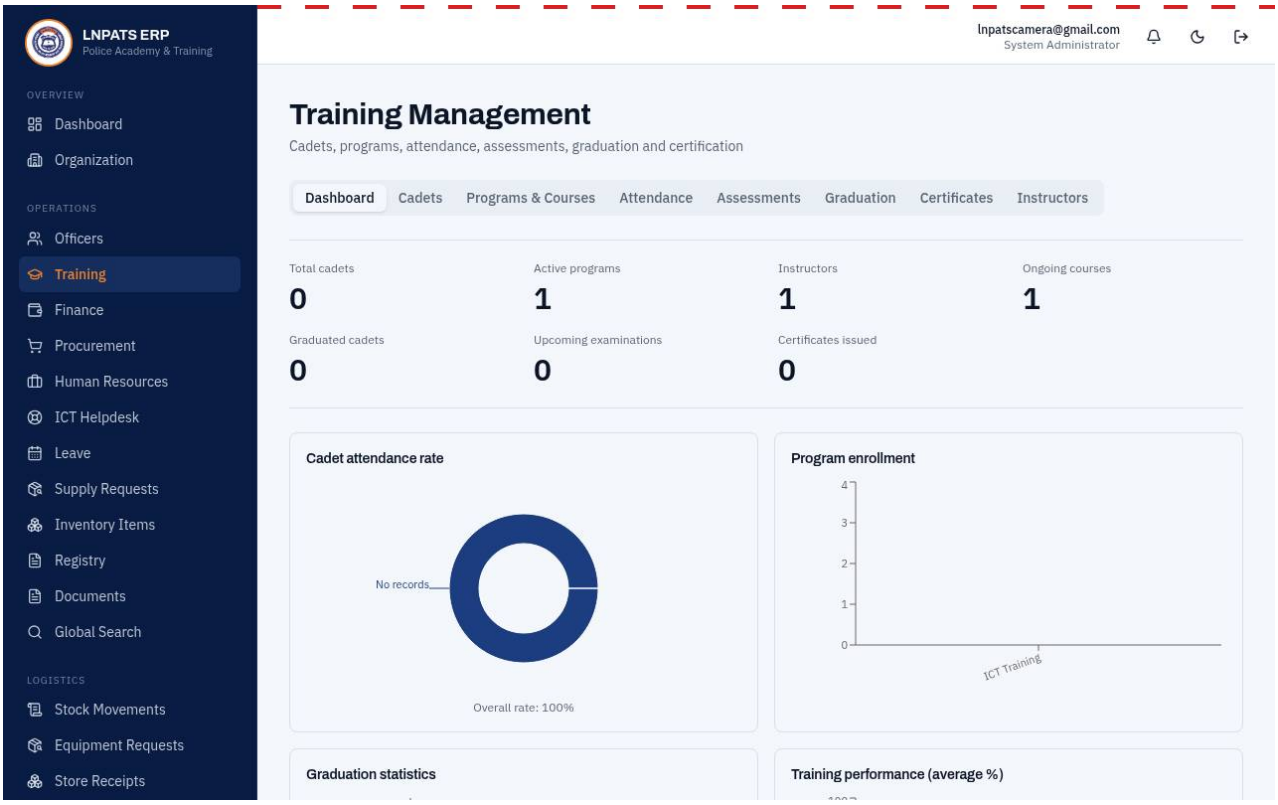

Tip: Personnel files are private — only authorised HR staff and the record owner can open them.

Tip: Payroll here is a salary summary; it does not pay anyone.

7. Training (Academy)

Who uses it: DC Academy, Section Heads, Commandant

Cadet registration, programs, courses, instructors, enrolment, attendance, assessments, graduation and certificates.

Steps

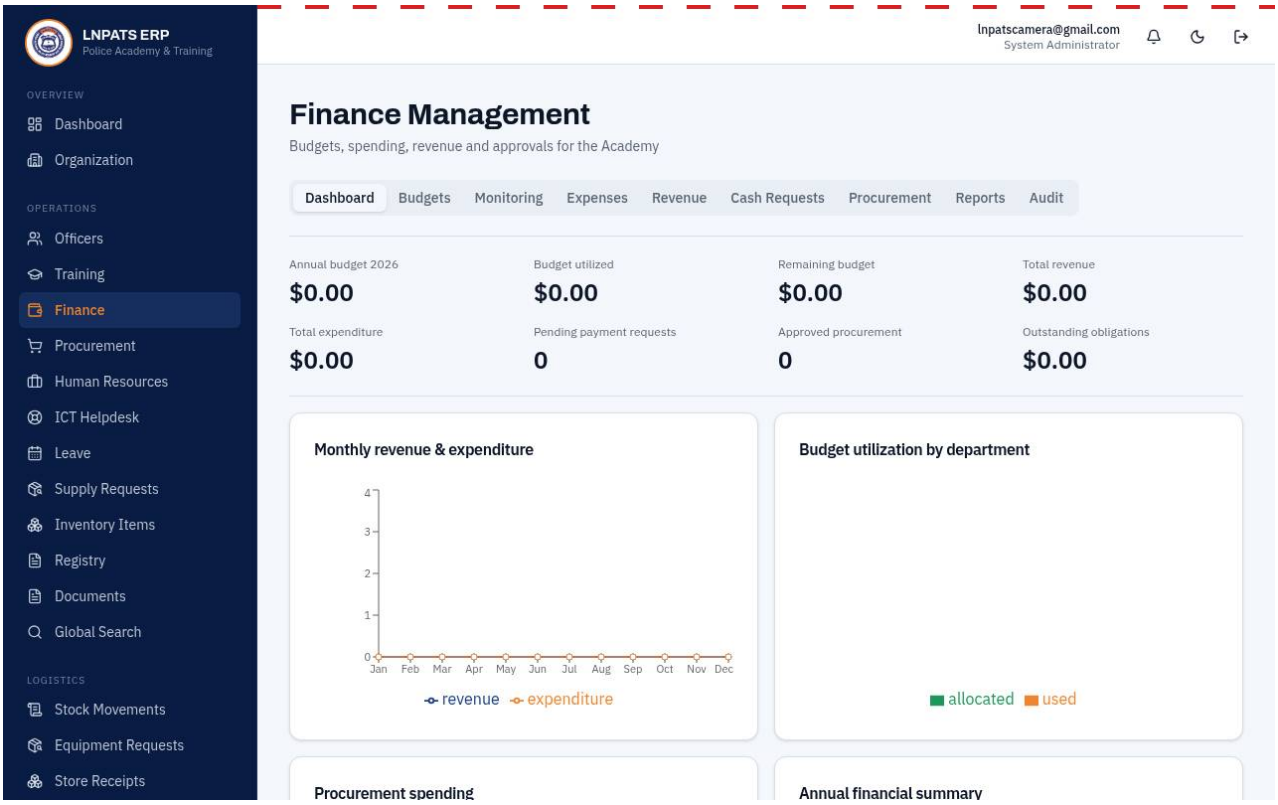

1. Register cadets and create programs, courses and instructors.
2. Enrol cadets into courses.
3. Section Heads record attendance and assessment results; grades are calculated automatically.
4. DC Academy or the Commandant approves graduation, which issues a certificate with a QR verification code.

Tip: Anyone can verify a certificate by its number or QR code.

8. Finance management

Who uses it: Finance Administrator, Department Heads, Commandant, Auditor

Budgets, monitoring, expenses, revenue, cash requests, procurement funding, reports and audit.

Steps

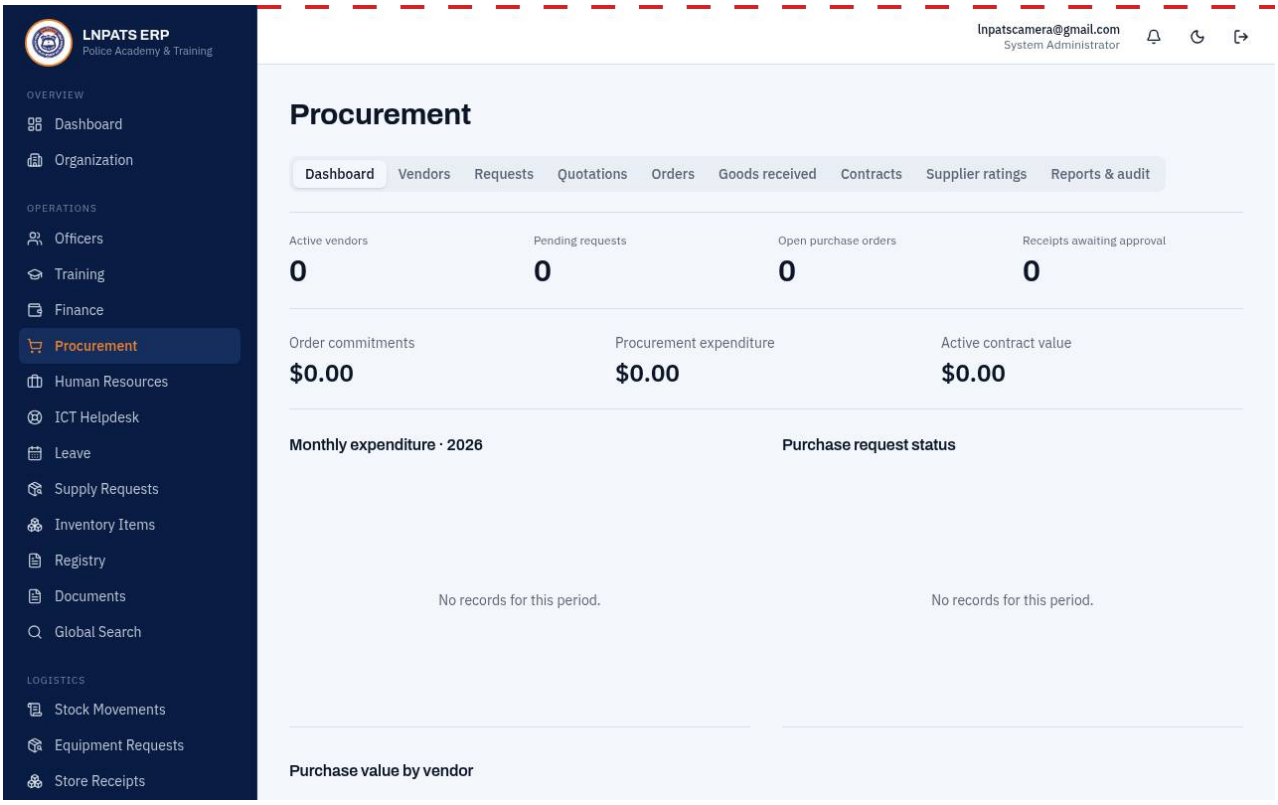

1. Create a budget for your section and submit it.
2. Approvers see items waiting for them and press Approve or Reject with a comment.
3. Record expenses against approved budgets; the system tracks remaining balance.
4. Expenses above $10,000 also require Commandant approval.
5. Download reports from the Reports tab.

Tip: A warning appears when a budget is 80% spent.

9. Procurement

Who uses it: Procurement Officer/Admin, Finance, Commandant, Storekeeper

Vendors, purchase requests, quotations (RFQ), purchase orders, goods received notes, contracts and supplier ratings.

Steps

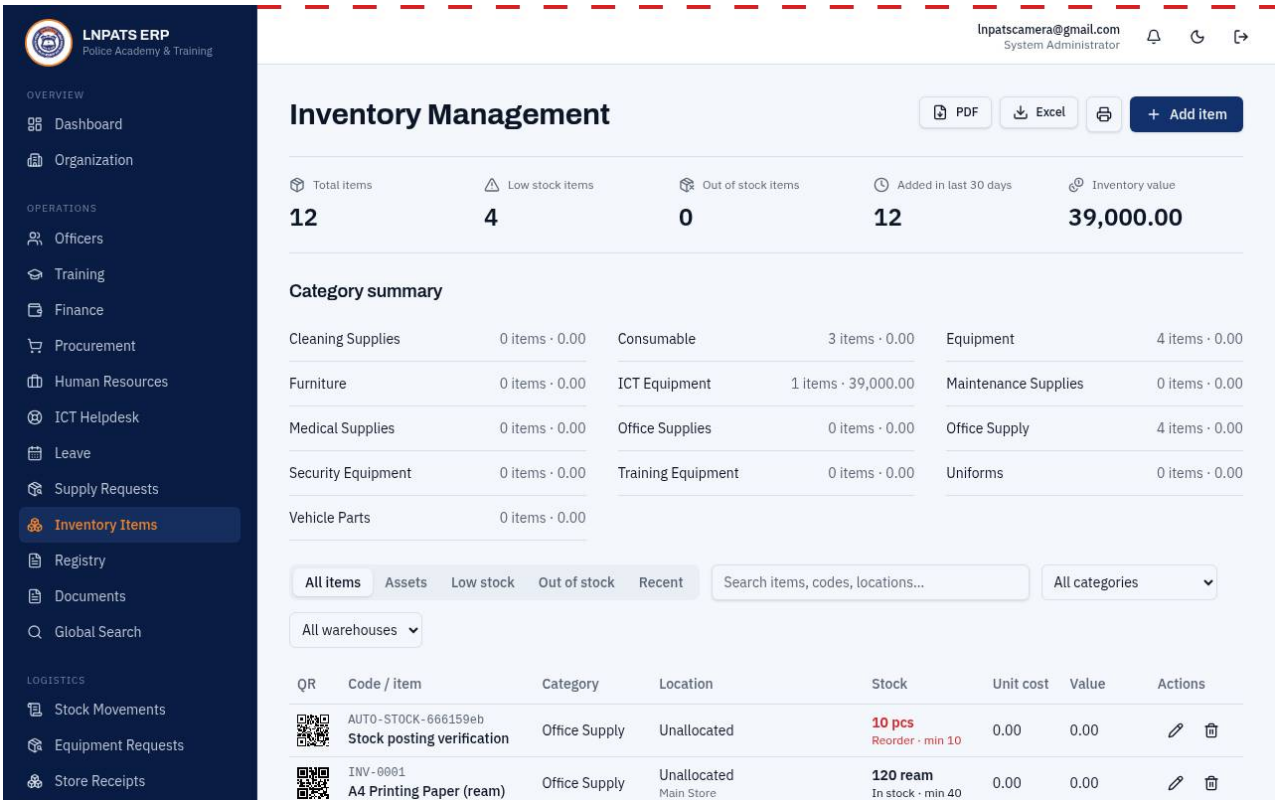

1. Register vendors with their category and documents.
2. Raise a purchase request with item lines; it follows Department Head → Procurement → Finance → Commandant (plus Chief of ICT for ICT items).
3. Send RFQs, record quotations and select the winning bidder.
4. Create, approve and send the purchase order to the vendor.
5. The Storekeeper approves the goods received note, which adds stock to inventory.

Tip: Contracts nearing expiry are highlighted for renewal.

10. Inventory & warehouses

Who uses it: Storekeeper, Logistics

All stock items with codes, categories, warehouses, reorder levels and values.

Steps

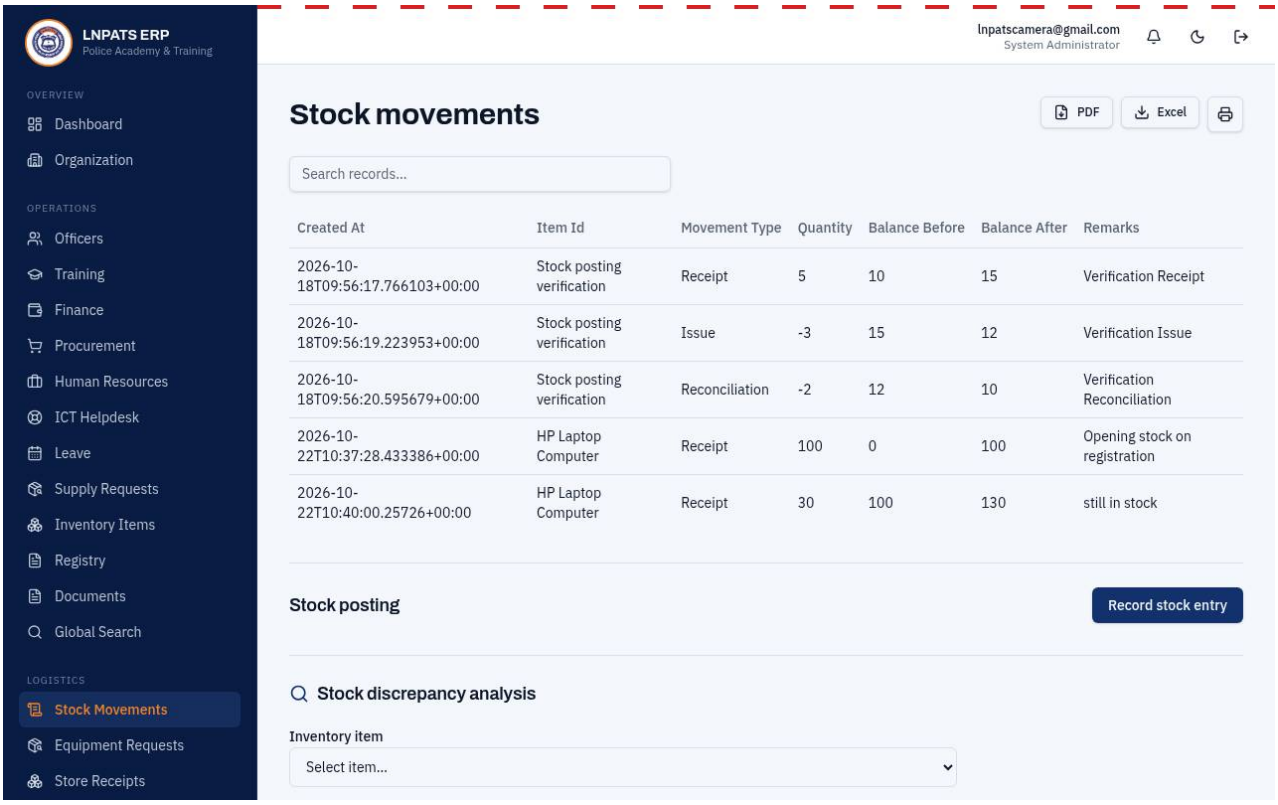

1. Open Inventory Items to view stock by warehouse with filters.
2. Register a new item; its opening stock is recorded as a receipt.
3. Use Transfer to move stock between warehouses.
4. Export the list to PDF or Excel.

Tip: Quantities change only through receipts, issues, transfers and reconciliations — never by editing.

11. Receipts, issues & stock movements

Who uses it: Storekeeper

Every change to stock is logged as a movement linked to its source document.

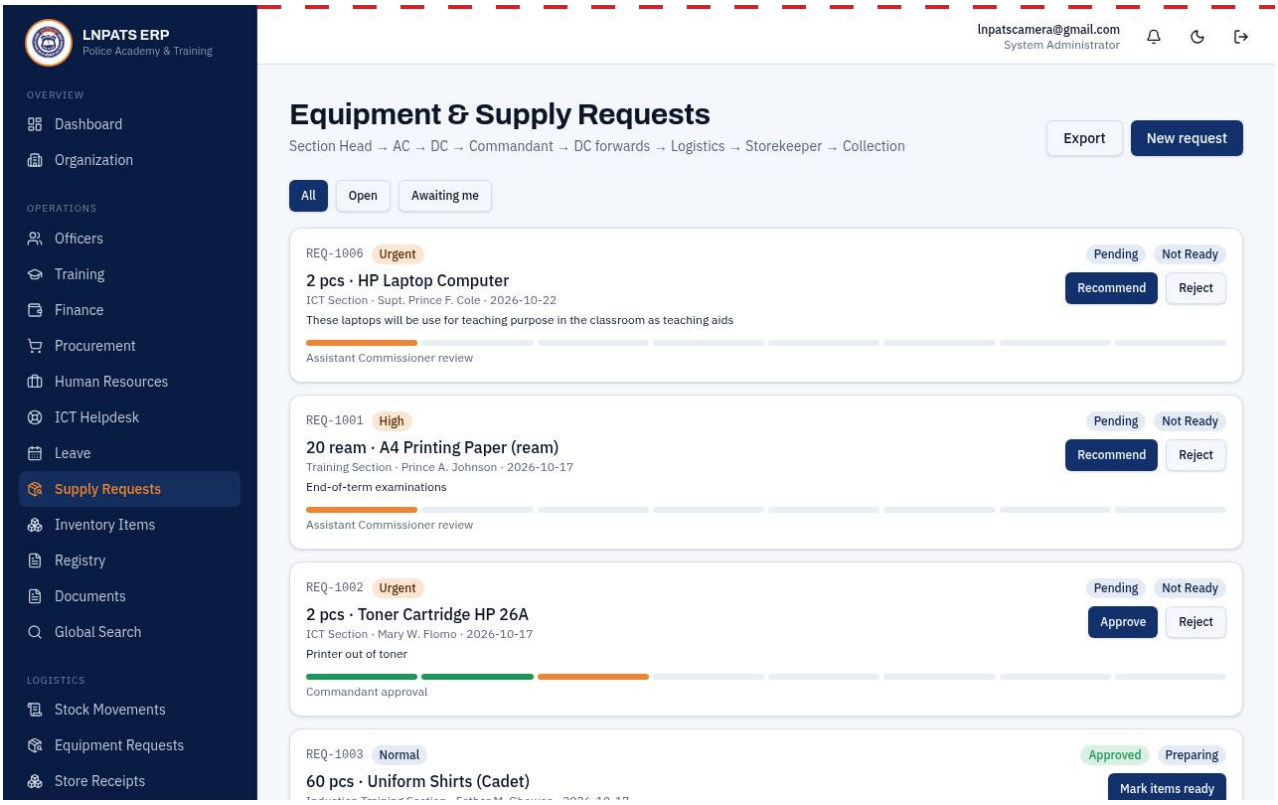

Steps

1. Store Receipts: record goods coming in.
2. Store Issues: record goods going out; shortages are refused.
3. Stock Movements: review the full history, including reconciliation adjustments.
4. Use the AI discrepancy analyser on an item to get suggested causes for a stock difference — it only advises and never changes stock.

12. Supply & equipment requests

Who uses it: All officers; approvers

Request supplies or equipment and track approval through to collection.

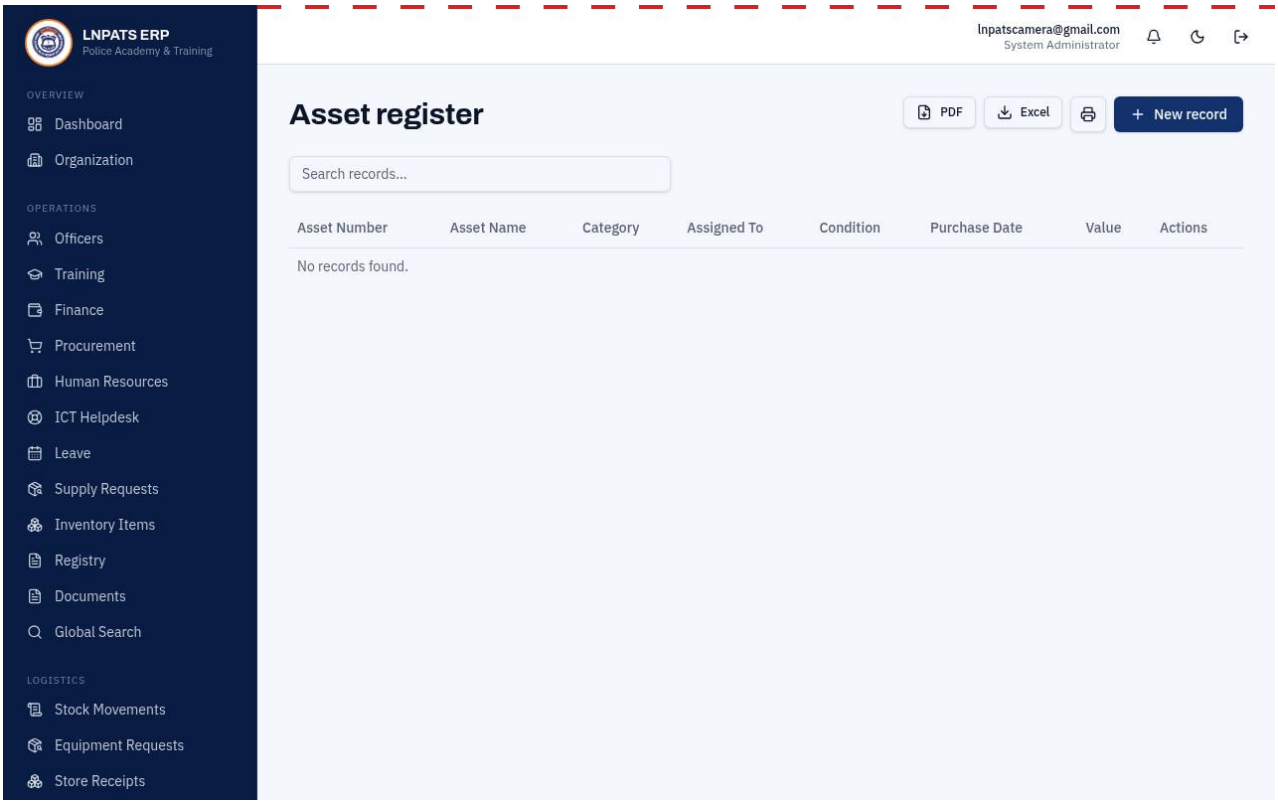

Steps

1. Open Supply Requests and press New request.
2. Add items and quantities and submit.
3. Approvers move it forward; once approved, the Storekeeper issues it on collection.
4. Equipment Requests shows the same requests for equipment items.

13. Suppliers, assets & vehicle bookings

Who uses it: Logistics, System Administrator

Registers of suppliers, academy assets and vehicle reservations.

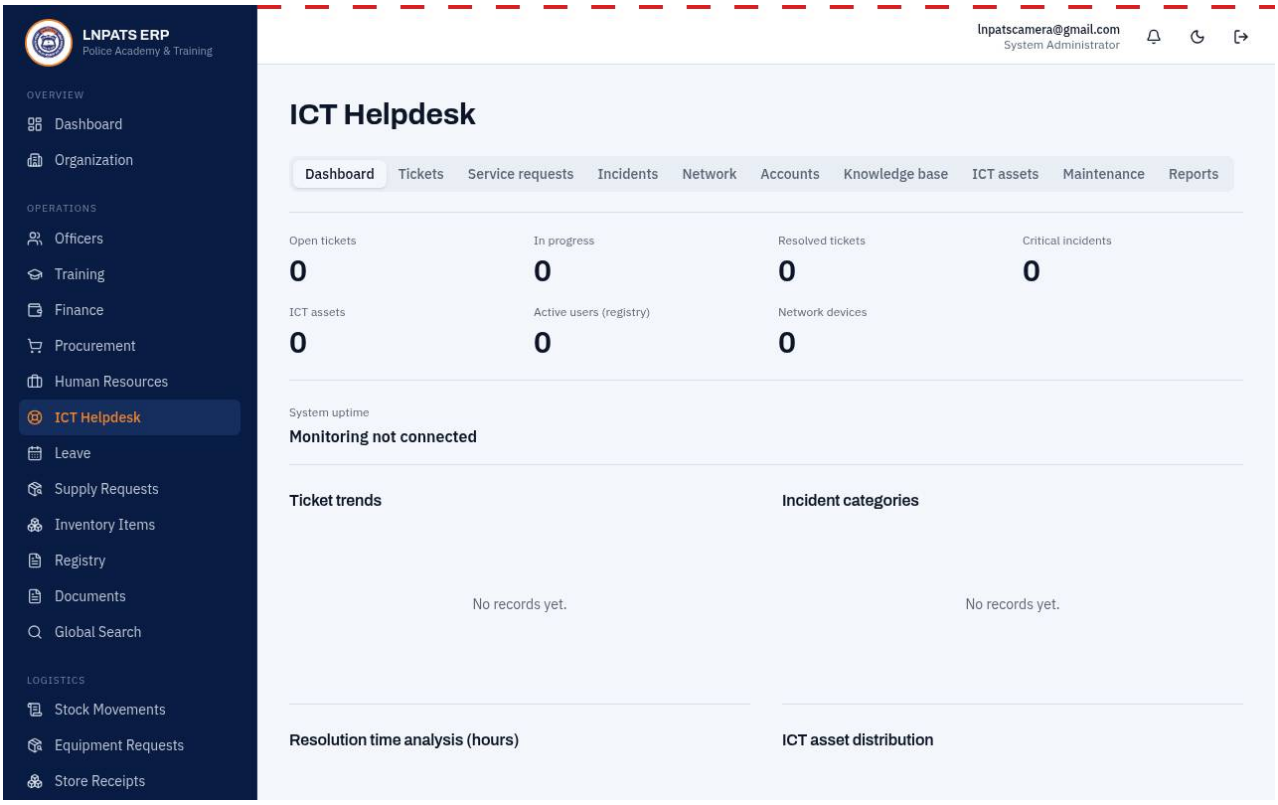

Steps

1. Suppliers: view and update vendor contact details.
2. Assets: record equipment, assignments and maintenance.
3. Vehicle Bookings: reserve a vehicle for a date and purpose.

14. ICT Helpdesk

Who uses it: All officers; ICT staff

Report IT problems, request services and manage ICT equipment and network records.

Steps

1. Open ICT Helpdesk and press New ticket; describe the problem and priority.
2. ICT staff assign, update and resolve tickets.
3. Track ICT assets, assignments and maintenance in their tabs.
4. Download helpdesk reports.

15. Command chain reports & supplies

Who uses it: All officers; supervisors, section heads, Commandant

Submit daily reports up the reporting line and request command supplies that pass a five-stage approval before Logistics issues stock.

Steps

1. Open Command and choose Daily Reports. Write your report and press Submit before the afternoon deadline (weekdays, Liberia time).
2. Your supervisor reviews it; it can be approved upward or returned for correction.
3. Section heads compile approved reports and can download them as Word documents.
4. For supplies, open Command Supplies, list the items and submit. After final approval, stock is reserved.
5. When Logistics marks the order ready, sign for pickup; Logistics then confirms collection and stock is deducted once.

Tip: Alerts appear in the Notification Center from 3 pm to 6 pm if a report is overdue.

Tip: HR must link your account and assign your supervisor before you can report.

16. Notification Center

Who uses it: Everyone

All alerts about approvals waiting for you, returned items and overdue reports in one place.

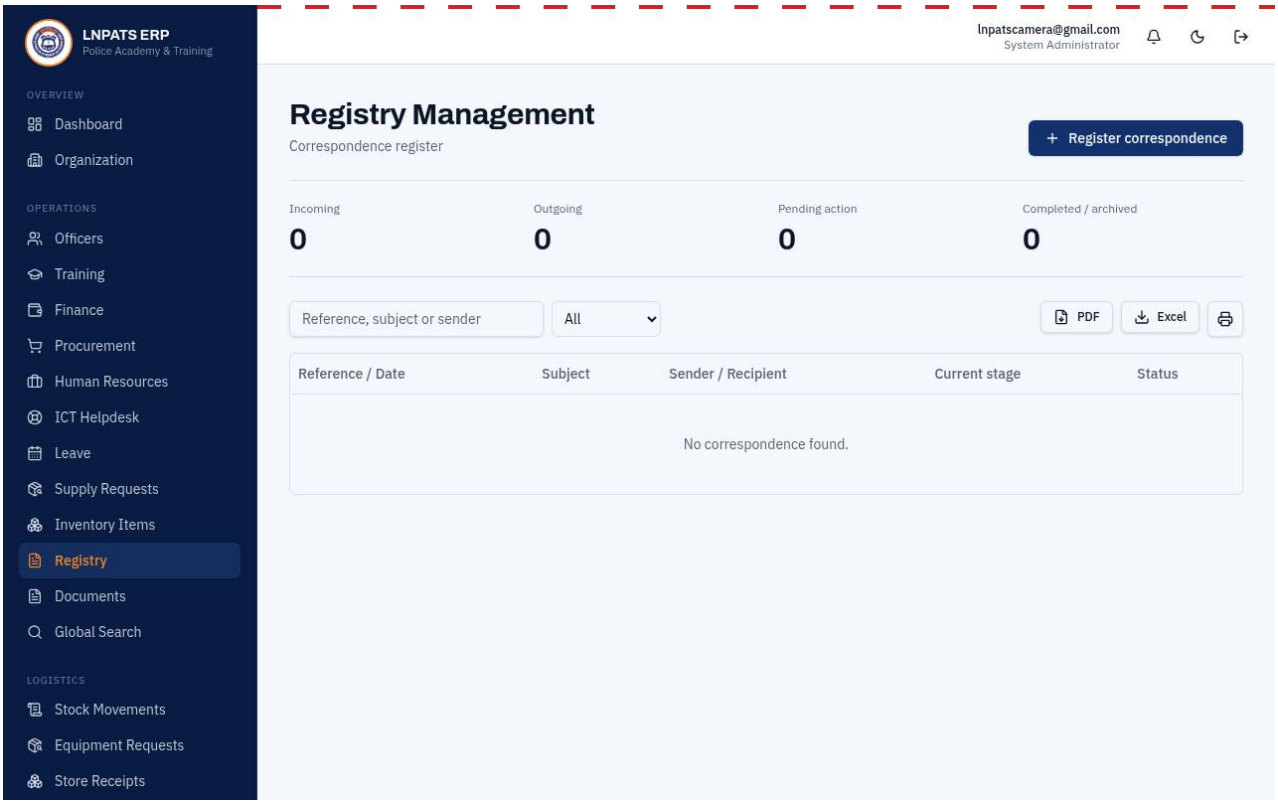

Steps

1. Click Notification Center in the menu or the bell icon.
2. Use the Unread filter to see only new alerts.
3. Open an alert to go straight to the record.

17. Registry (correspondence)

Who uses it: Registry Officer, Commandant

Incoming and outgoing letters, numbered automatically as LNPATS/IN/YYYY/0001 or LNPATS/OUT/YYYY/0001.

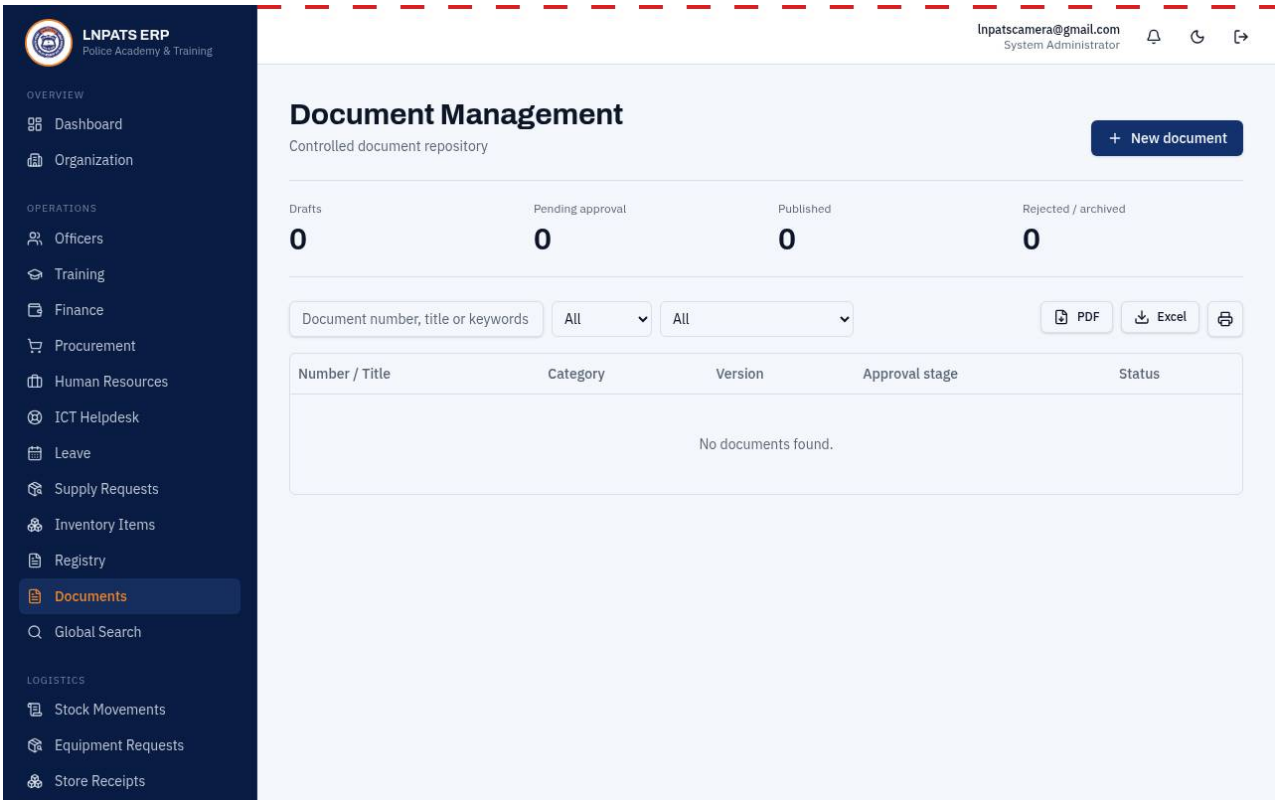

Steps

1. Register a new incoming or outgoing item and attach the scanned letter.
2. Route it for review, action and response through each workflow step.
3. Archive when complete; the full history is preserved.

18. Documents

Who uses it: All staff; approvers

Official documents with categories, versions, approvals and publishing.

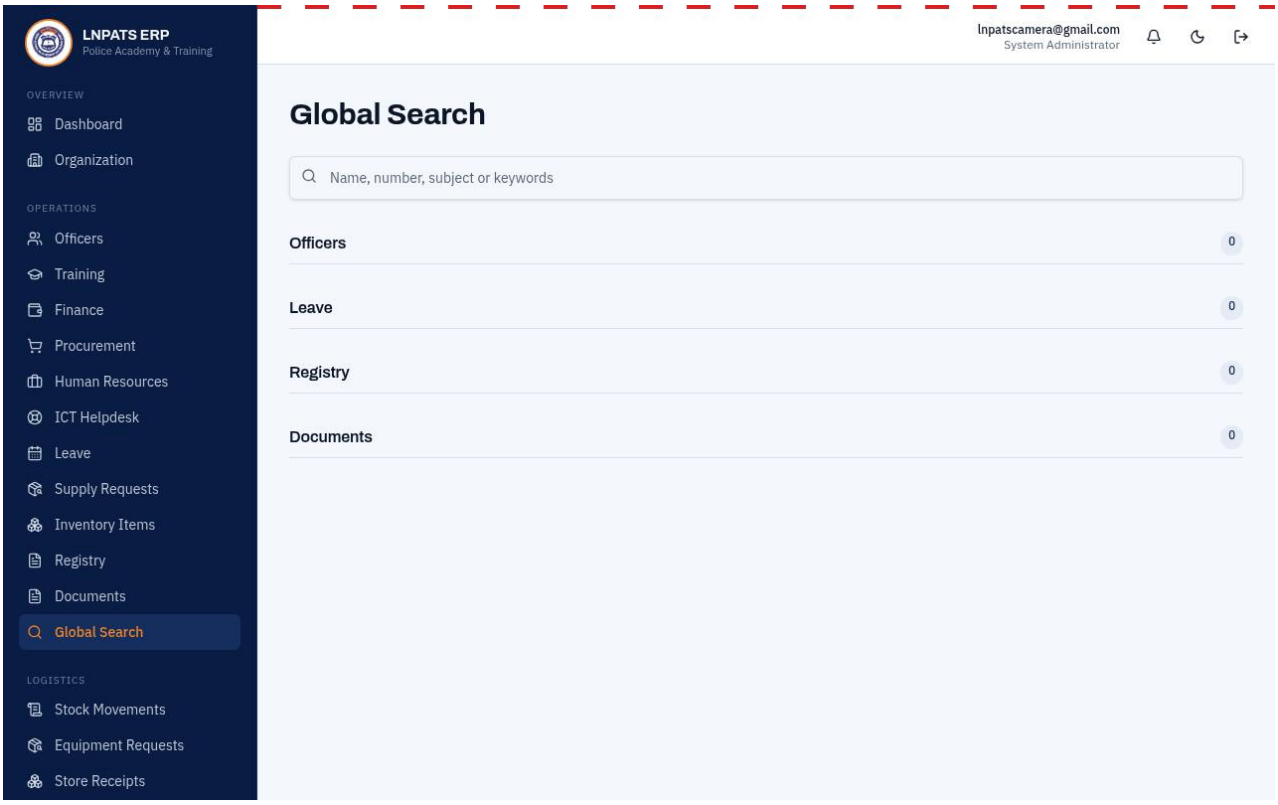

Steps

1. Upload a document and choose its category.
2. Submit for approval; approvers sign off by name.
3. Publish once approved. Upload a new version or roll back to an earlier one when needed.

19. Global search

Who uses it: Everyone

Find officers, requests, correspondence and documents from one place.

Steps

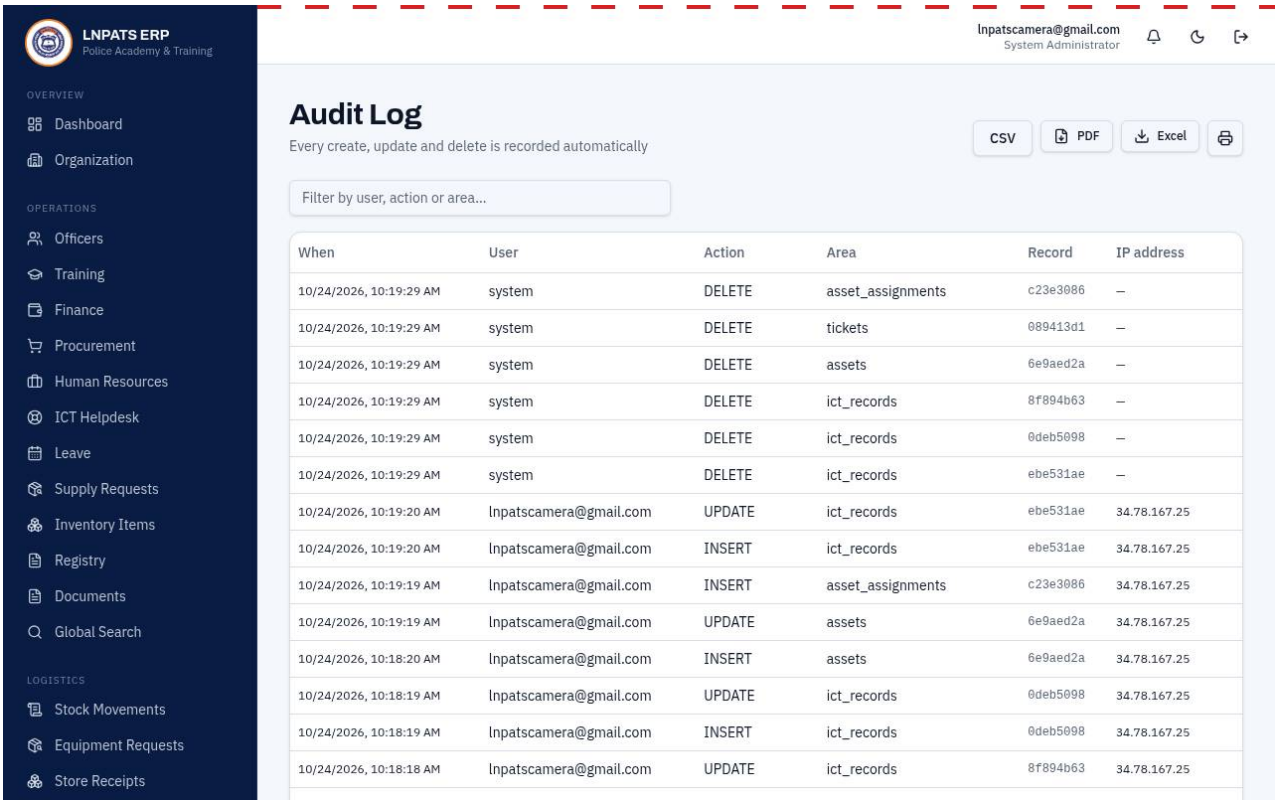

1. Open Global Search, type a name, number or reference, and open a result.

Tip: You only see results you are allowed to access.

20. Audit log

Who uses it: System Administrator, Auditor

Every create, update and delete is recorded automatically with who did it and when.

Steps

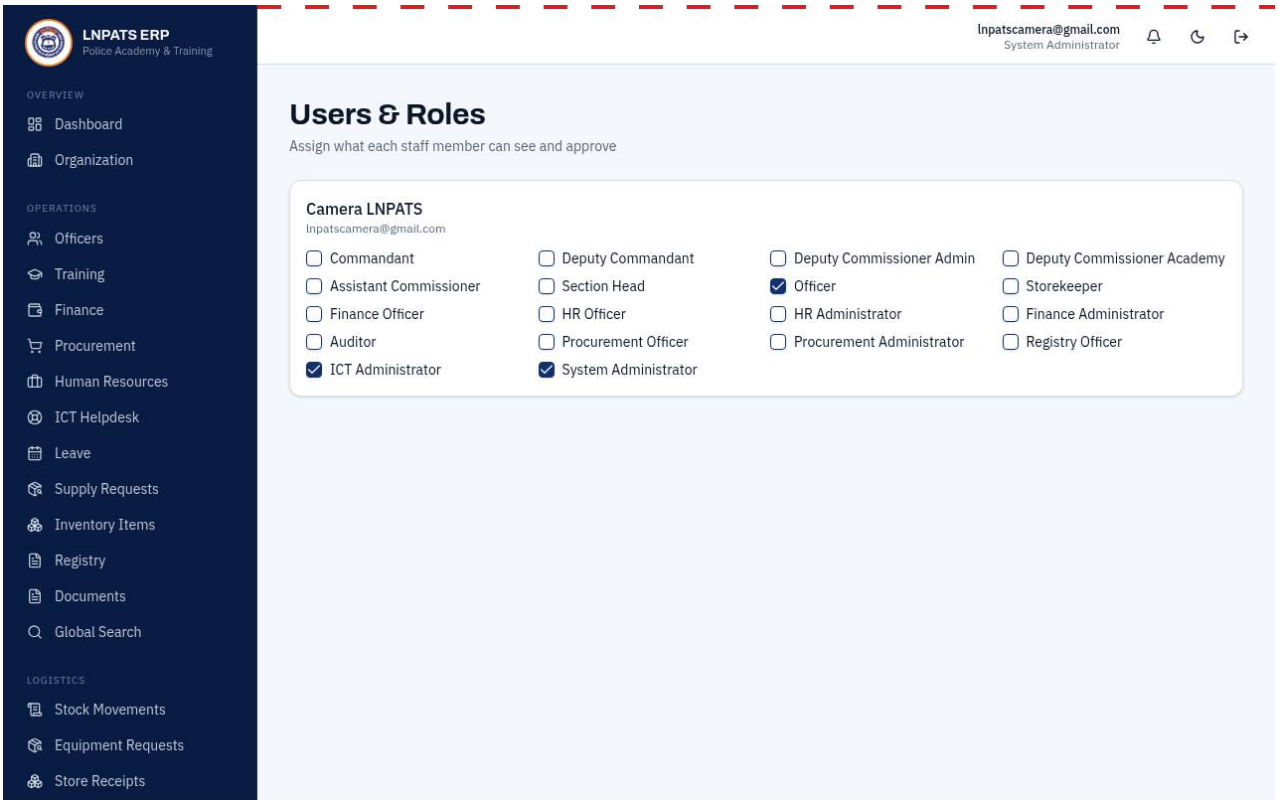

1. Open Audit Log and filter by user, action or area.
2. Export to CSV, PDF or Excel for review.

Tip: Audit records are permanent and cannot be edited.

21. Users & roles

Who uses it: System Administrator

Assign roles that control what each person can see and approve.

Steps

1. Open Users & Roles and find the person.
2. Tick the roles they need (e.g. Commandant, HR Officer, Finance Administrator, Storekeeper, Registry Officer, ICT Administrator).
3. Changes take effect the next time they open a page.

Tip: Give each person only the roles their job requires.
